***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 2-7 and 13-17, drawn to an object system having a state change registration and notification system, classified in class 719, subclass 318.

II. Claims 8-9 and 18-19, drawn to an object development system, classified in class 717, subclass 140.

III. Claims 10-12 and 20-22, drawn to a system of objects having object templates, classified in class 707, subclass 103R.

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as creating objects using templates. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
